

# Kombicolor MAX: WHEN SIZE MATTERS

**2 cm longer** than  
the former Kombicolor

- Every part of the gun is protected by the sheath for a perfect hygiene.
- Increased length: enabling easier and more precise insemination.
- Greater durability: The increased thickness makes the Kombicolor MAX insemination gun more resistant to impacts, wear, and repeated use, ensuring a longer lifespan.
- Perfect combination between alpha sheath\* and Kombicolor MAX: ensure high security insemination, animal well-being and time savings.
- It is compatible with both mini and medium straws when paired with an alpha sheath or a universal unsplit sheath.
- Available in 5 colors to facilitate the identification.

\*Alpha sheath: 024485
